2:30 p.m.	Case Analysis / Discussion Period
4:00 p.m.	Adjourn

LEARNING OBJECTIVES

- ◆ Become familiar with Interpersonal Relational Theory, including the basic tenets of the theory as well as the research supporting the theory
- ◆ Understand the clinical applications of Interpersonal Relational Theory

ABOUT DSPP

The Dallas Society for Psychoanalytic Psychology (DSPP) is a local chapter of the Division of Psychoanalysis, Division 39, of the American Psychological Association. Founded in 1983, DSPP directs its efforts to exploring and promoting psychoanalytic theory and its applications as a basis for understanding human experience and for various forms of psychotherapy. DSPP's members come from a number of mental health fields and include counselors, nurses, physicians, psychoanalysts, psychologists, social workers, and students. DSPP emphasizes the application of psychoanalytic theory to a variety of clinical settings.

WORKSHOP LEADER

Joseph Weiss, MD

Interpersonal Relational Theory (sometimes referred to as Control-Mastery Theory) is based on Dr. Weiss's "control hypothesis." Control hypothesis asserts that individuals in therapy strongly desire to improve, and will bring forth unconscious mental contents (impulses, memories, ideas, etc.) when they unconsciously decide that they can safely do so. Thus, the work of the therapy centers around creating an atmosphere of security in which the individual can overcome anxiety regarding unconscious mental contents and bring them forth.

The first empirical work supporting Dr. Weiss's control hypothesis was published in 1972; the San Francisco Psychotherapy Research Group (formerly the Mt. Zion Psychotherapy Research Group) continues to conduct and publish empirical research based on the control hypothesis. Currently, the Group consists of over 100 researchers and clinicians who have published over 100 papers in the last ten years.

Case Presentation

Scott Nelson, PhD

Scott Nelson is a graduate of the Clinical Psychology Ph.D. program at the University of Texas Southwestern Medical Center at Dallas. He completed his undergraduate work at Southern Methodist University, majoring in history and religious studies. He is currently on faculty at UT Southwestern in the Department of Rehabilitation Counseling Psychology. He conducts intensive groups for individuals with a wide range of psychological and developmental difficulties. He also sees patients in individual psychodynamic psychotherapy.
